

CONNECTING YOUR META QUEST TO WI-FI

SkillsVR Headset Support Guide | Meta

STEP-BY-STEP GUIDE

Connecting Your Meta Quest Headset to Wi-Fi

Connecting to Wi-Fi via the Headset

- » Turn on the headset and press the Meta button (or Oculus icon) on the right controller to open the universal menu.
- » Select the clock on the left-hand side of the universal menu to open Quick Settings.
- » In the top right, click on Settings, then select Wi-Fi.
- » Ensure the Wi-Fi toggle is turned on.
- » Choose your Wi-Fi network from the list of available networks and select Connect.
- » If prompted, enter your Wi-Fi password and select Connect to complete the connection.

Connecting to Wi-Fi via the Meta Horizon Mobile App

- » Open the Meta Horizon mobile app on your phone.
- » Tap your avatar picture at the bottom of the screen.
- » Tap the Settings icon in the top right.
- » Select Devices from the menu.
- » Choose the headset you are using from the list.
- » Tap Headset Settings and then Wi-Fi.
- » Select your Wi-Fi network from the list and enter the Wi-Fi password.
- » To check the security of the network, tap the connected network name to see additional information such as the security protocol (e.g., WPA/WPA2 PSK).

Troubleshooting Tips

If you're having trouble connecting your Meta Quest headset to Wi-Fi, here are some tips to help you get back online:

- » Check Your Wi-Fi: Make sure your Wi-Fi is working properly by checking other devices for a connection.
- » Stay Within Range: Move closer to your router if the signal is weak.
- » Avoid Public Networks: Avoid connecting to public Wi-Fi hotspots during setup (e.g., at airports or hotels), as they can cause issues.
- » Restart Your Headset: A quick reboot can resolve many Wi-Fi connection issues.
- » Switch Networks: If your headset connects to a different Wi-Fi network, the issue may be with the original network settings. Try connecting to another network to troubleshoot further.
